

We Are The Difference

THE TRUSTED SUPPLEMENT MANUFACTURER

Exceptional Production Speed:

40 Million Tablets Weekly • 1.6 Million Capsules Daily • 0 Recalls

Flavor Innovation:

35+ years of mastering taste in every formulation

Worldwide Ingredients:

Sourcing the finest — from value options to premium blends
— for your perfect formulation.

Elevating supplement manufacturing
...into an art of precision, quality & scale.

Full In-House Lab:

Unlike most supplement manufacturers, we operate our own on-site lab. Delivering faster turnaround, exceptional quality control, and end-to-end certification support while minimizing compliance risk.

Full-Certification Capability:

Contact BNipure to learn how we will help you succeed.

Custom Formulator & Manufacturer of Quality Dietary Supplements

Tablet Manufacturing:

- Single-layer, multi-layer, chewable, coated
- Customized colors, shapes, embossing
- On-site compression and inspection
- Moisture and hardness validation

Private Label Support:

- Private-label stock formulas
- Custom label designing
- Regulatory packaging compliance
- Lot coding and shrink-banding

Capsule Manufacturing:

- Gelatin and vegan capsules (sizes 0-00)
- Banding, encapsulation, and blending
- Dissolution and weight-uniformity testing
- Batch documentation and traceability

Packaging & Fulfillment

- Glass /plastic containers or pouch filling
- Label application and tamper-evidence
- FNSKU / Amazon FBA prep
- Domestic and international shipping

Powder Manufacturing:

- Flavored / unflavored custom blends
- Flavor masking and flow optimization
- Scoop and sachet filling
- Bulk or retail packaging options

Ingredient Procuring:

- Sourcing worldwide ingredients from cost-effective to premium blends

Pet Vitamin Manufacturing:

- Custom formulations for dogs, cats, and specialty pets

Full In-House Lab

- Microbiology lab ensuring product safety and shelf stability
- Potency, purity, and identity verification using validated methods
- Full traceability from raw material intake to finished product release
- End-to-end certification & audit support (FDA, NSF, cGMP, Halal, Kosher)
- Stability testing to verify product lifespan and label claims
- Retention sample library for regulatory compliance

Raw Material Testing

- FTIR and NIR spectral matching for rapid ingredient verification
- Gas Chromatography–Mass Spectrometry (GC–MS) for volatile compounds
- ICP–MS / ICP–OES for heavy metal and mineral quantification
- HPLC and UPLC for active ingredient potency and purity testing
- Karl Fischer titration for precise moisture analysis
- Microbial enumeration & pathogen screening (E. coli, Salmonella, yeast, mold)
- Disintegration and dissolution testing for tablets and capsules
- Nitrogen Analyzer for total protein quantification
- Environmental monitoring of lab air/surfaces to ensure contamination-free testing zone
